Overview

The Score Range Audit Report is used during the execution of a scoring session. The purpose of this report is to alert the session coordinator of any instances where the scorers view a particular student's paper so differently that their scores fall outside of a predefined audit range.

Options

Filterable by:

- School year/scoring session (required filter)
- School

A printable version of the report is available.

Please note: The audit range that controls this report is controlled by your district via the district settings page, when selecting this range please remember that you are setting the value that the difference must be in excess of to trigger the report.

Overview

The Score Count Audit Report is used later in the execution of a scoring session. The purpose of this report is to flag any papers that have only been scored once. The goal is to catch any papers that have fallen through the cracks and insure that all papers are scored at least twice.

Options

Overview

The Student Detail Report is a post scoring session report used as an analytical tool. This report provides detailed student performance for a particular scoring session.

Additionally a version is available that page breaks between students to allow for the printout to be used in individual parent teacher conversations.

Overview

The School Detail Report is a post scoring session report used as an analytical tool. This report provides detailed student performance for a particular scoring session summarized by grade level within a school. A key feature that makes this a wonderful analytic tool is the ability to sort the report based on the students' performances on a particular trait.

The Excel .csv (comma separated value) file has been successfully created for your search criteria and contains 2543 student records.

 [Click here](#) to download the .csv file.

 [Click here](#) to download a sample Word merge document of the Parent Letter.

Overview

This report provides a district with the ability to quickly produce a customized letter for each student reporting on that student's performance on the writing assessment. The key concept behind this report is to provide the district with the ability to produce customized student letters via a Word merge process. As such, two files are returned as a result of executing this report, one file contains the data for the merge and the other file contains a sample parent letter that can be modified by the district for their exact needs.

As a side note, many districts use the data file produced by this report for importing the students' scores into their student management system.

Your School District

March 24, 2003 10:30 AM

Dear Parents of «StudentLName», «StudentFName»

Twice per year, in the fall and spring, students in grades 3-12 write to a designated prompt. Teams of teachers evaluate these writings holistically and analytically. The holistic score represents an overall impression on a 1-«ScoringScale» Scale, with «ScoringScale» being best. The analytical scores focus on six specific traits of good writing:

- **Ideas** - the writer's thoughts are relevant and well-developed
- **Organization** - the plan of the writer is apparent and the writing is easy to follow
- **Voice** - the personality of the author is evident
- **Word Choice** - the writer appropriately uses powerful verbs and descriptors
- **Fluency** - the writing flows and sounds pleasant to the ears
- **Conventions** - the writer demonstrates a command of the rules of writing

The degree to which each of these traits is demonstrated is again evaluated on a 1-«ScoringScale» scale.

The results on these writing assessments help us monitor individual student growth and the writing program in the Your School District. Please review «StudentFName»'s scores which are listed on this sheet.

Sincerely,

The Writing Assessment Team
